Kiryana Playwright QA Coverage Report

Application: https://kiryana-pos-crk.pages.dev
Date: 28 October 2026
Browsers: Chromium and Firefox

Final expanded matrix: 66 passed, 0 failed, 0 skipped. Serial execution took approximately 3.3 minutes. Credentials were runtime-only.

Covered before today

- Landing, routing, HTTP 200, login and registration reachability
- Language switcher and mobile public pages
- Required fields, invalid credentials, invalid mobile/PIN, protected submit
- Authenticated dashboard, stock, sale, draft bill, controlled cash sale
- Logout, refresh persistence, protected-route redirect
- Authenticated English switch and dashboard mobile layout
- Chromium and Firefox cross-browser smoke matrix

Covered today

- Boundary-length mobile/PIN rejection
- Invalid registration mobile and mismatched PIN confirmation
- Authenticated English verification on stock and sale
- Authenticated mobile stock and sale usability
- Product-form required-field validation without saving
- Cleared session redirects to login (expiry simulation)
- Profit seven-day summary and daily entries
- Empty customer and supplier ledgers with creation actions

No new shop, customer, supplier, product, or sale was created during today's extension checks.

Still outstanding

- True server-side session expiry
- Successful shop registration and duplicate web-address handling
- Product create/edit/delete lifecycle
- Additional POS checkout and receipt-generation coverage

- Customer/supplier credit creation and settlement
- Dashboard date filtering
- Full Urdu/English authenticated content verification
- Additional authenticated responsive interactions
- WebKit combined-suite stability investigation
- CI, storage-state optimization, and resettable test data

Assessment

Core public and authenticated smoke paths are stable in Chromium and Firefox. Today's checks broadened validation, localization, responsive, session-clearing, profit, ledger, and product-form coverage without adding persistent live data.

Detailed case IDs and execution history are in TEST-REPORT.md. No credentials are included.
